## 5 Water Conservation Tips to Help You Save

During warm summer months, we all tend to spend more time participating in outdoor activities. Since many of these activities – gardening, working on our lawns, and washing our cars – include the use of water, your water usage and your water bill can increase significantly.

Below are 5 tips on how to conserve water and still maintain a beautiful green landscape.

- Adjust your sprinklers so that they're watering your lawn and garden, and not the street or sidewalk.
- Water before 10 a.m. or after 6 p.m. when temperatures are a little cooler and water evaporation is minimized.
- Invest in a timer or automatic watering system. Be sure to adjust your water schedule throughout the season. Your gardens and lawn's water needs may vary depending on the heat and amount of rain.
- Adjust your mower to a higher setting. A taller lawn provides shade to the roots and helps retain soil moisture so your lawn requires less water.

- When watering potted plants, group plants with like watering needs. Also, creating "watering zones" in your garden will allow you to give each plant the water it requires.

### **A Few More Ways Marietta Power and Water Can Help You Conserve Water and Save**

Visit [www.mariettopowerandwater.com](http://www.mariettopowerandwater.com), click on the Resources button in the top navigation bar, then select Water Conservation. There you will find information on how to request a free Water Conservation Kit that includes:

- 3 low flow sink aerators
- Low flow shower head
- Toilet tank water saver
- Leak detection kit

Also, check out the shower and water drip calculators. The shower calculator can tell you how much water you could be saving if you are able to shorten the length of your shower. The water drip calculator can tell you how much water a year you could be wasting if you have a dripping faucet.
